

For Windows 98 SE, Windows NT4, Windows ME, Windows 2000 and Windows XP

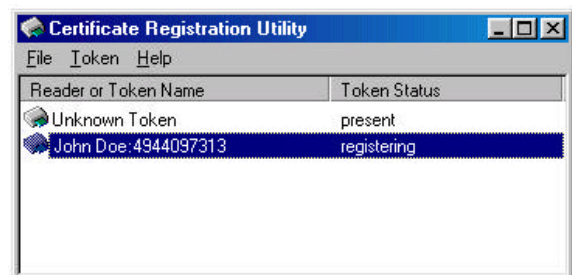

## **OUTLOOK 2000**

### **INSTALLING CERTIFICATES**

#### **Loading Health Care Individual (HCI) certificates into Microsoft Cryptographic Storage area using Towitoko chipdrive and StarCOS smart card**

1. Insert your smart card into the Towitoko chipdrive smart card reader. The light on the smart card reader will glow red once the card is inserted correctly. When the card has been read the light will turn off. If the light blinks on and off then the Smartcard has been inserted incorrectly.

2. The SafeSign software used with Towitoko chipdrive will automatically display and register the smart card Public certificates with Microsoft Cryptographic Storage area.

You have now registered your smart card for use with the Microsoft Cryptographic Storage area.
